### Soft Skills

Adaptive | Collaborative

### Professional Summary

A Java backend developer with expertise in building scalable and robust systems. My skills include designing, implementing and maintaining high-performance applications. I am passionate about technology and continuously learning to stay up-to-date with the latest industry trends.

### Projects

#### Online Sweet Mart

We are the 5 contributors who built REST API for an Online Sweet Mart within 3 days for all the modules and for security, we added spring security.

**Features:** Modules | Repositories | Service Controller | Exception Handlers | User | Admin Backend Connectivity | REST API | Fetch | CRUD

**Tech Stack:** Springboot | Hibernate | Swagger Lombok | JPA | JDBC | Java | MySQL | Spring Sec.

**Areas of responsibility:** Admin Module OrderBill Module | SweetOrder Module

#### Human Resource Management System

It is an individual full-stack web application made within 3 days where the admin will add a project to the particular department and the employee will work on that project. An employee can update project status, apply for leave, and other features present.

**Features:** DAO | Custom Exceptions | Database Connectivity | CRUD | Leave Request | Add Dept. Login/Logout | Update Project Status | CRUD etc.

**Tech Stack:** Java | Servlet | JSP | JSTL | JDBC MySQL | Tomcat Server | HTML | CSS | Maven
